Note:1) The part numbers indicated in the above table are for products with a brazed seam.

When ordering products with a butted seam, add the prefix "WS" to the part number (ex. 2-4B → **WS2-4B**).

2) Delivery lead times may vary depending on the product. Contact JST for details.

Note: 1) *The crimping will be more secure if the total cross-sectional area of the wire is at least 0.5 mm².

Examples: If the cross-sectional area of the wire is 0.3mm², fold the wire in two when crimping the terminal.

If the cross-sectional area of the wire is 0.5mm², crimp the terminal onto the wire as it is.

2) The part numbers indicated in the above table are for products with a brazed seam.

When ordering products with a butted seam, add the prefix "WS" to the part number (ex. V2-4B → **VWS2-4B**).

3) To order products with nylon insulation, change the "V" in the part number prefix to "N" (ex. V2-T4B → **N2-T4B**).

Because nylon absorbs moisture, care must be taken concerning storage.

4) Delivery lead times may vary depending on the product. Contact JST for details.

Note: 1) The part numbers indicated in the above table are for products with a brazed seam.

When ordering products with a butted seam, add the prefix "WS" to the part number (ex. FVD2-4B → FVDWS2-4B).

2) To order products with nylon insulation, change the "V" in the part number prefix to "N" (ex. VD2-4B → ND2-4B).

Because nylon absorbs moisture, care must be taken concerning storage.

3) Delivery lead times may vary depending on the product. Contact JST for details.

RING TONGUE TERMINAL

Terminals mounted on transparent tape can be crimped efficiently by a specially-designed automatic crimping machine. In addition, high uniform crimping is ensured since the terminals are crimped at a fixed position. To identify tape-mounted terminals, "TOR" is affixed to the parts numbers of non-taped terminals.

Ordering example: "0.5-2 TOR".
